

**Metal ware by Harmony Forge** - hand-crafted from semi-precious Britannia alloy, a metal 15 to 20 times more costly than lead based metal found in many cast metal miniatures. However, it will not decompose when enclosed in a case or room box as lead alloys are prone to do. The finish on most pieces is a metallic gray-black with a burnished finish - the same as the original full-sized pieces were finished. It can be painted flat black if desired. Pictured left to right.

166099	Square fireplace trivet .....	\$18.00
166100	Round fireplace trivet .....	\$5.00
166102	Grisset - used for melting tallow, etc.....	\$5.00
